### **Mac OS Compatibility**

Almost all current Dino-Lite USB models are compatible and include software for Mac OS. The exceptions are models with EDOF & EDR as well as several older (and now discontinued) models. If you are interested in a Dino-Lite for Mac and are unsure about the compatibility please contact us for verification.

- Most previous generation models including Dino-Lite Original, Plus, and Pro series microscopes (3-digit number) are compatible from Mac OS 10.4 (Tiger) through Mac OS 10.10 (Yosemite).
- Most current generation models including Dino-Lite Basic, Premier, and Edge series microscopes (4-digit number) are compatible from Mac OS 10.5 (Tiger) and above.
- Any models that are only compatible with Windows can also be run on a Mac OS computer by using Bootcamp or Parallels. Please check the page for a specific product to confirm whether it is compatible with your exact operating system version, or contact us if you have any questions.

## Which macOS version is installed?

From the Apple menu in the corner of your screen, choose About This Mac. You should see the macOS name, such as macOS Mojave, followed by its version number. If you need to know the build number as well, click the version number to see it.

This example shows macOS Catalina version 10.15 build 19A583.
